### Listing of Claims

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Previously Presented) A composition for application to human skin to improve the appearance of the skin, comprising:
  - (a) Retinyl Palmitate Polypeptide;
  - (b) Ascorbylmethylsilanol Pectinate;
  - (c) Tocopheryl Polypeptide;
  - (d) Cholecalciferol Polypeptide; and,
  - (e) Niacinamide Polypeptide.
2. (Previously Presented) A composition as claimed in claim 1, wherein the ratio of said Retinyl Palmitate Polypeptide to said Ascorbylmethylsilanol Pectinate to said Tocopheryl Polypeptide to said Cholecalciferol Polypeptide to said Niacinamide Polypeptide is 95: 1.25: 1.25: 1.25: 1.25.
3. (Previously Presented) A composition for application to human skin to improve the appearance of the skin comprising Ascorbylmethylsilanol Pectinate and Cholecalciferol Polypeptide.
4. (Previously Presented) A composition for application to human skin to improve the appearance of the skin comprising Ascorbylmethylsilanol Pectinate, Cholecalciferol Polypeptide, and at least one component selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.
5. (Previously Presented) A composition for application to human skin to improve the

Serial No. 09/922,233 filed 8/3/2001

Response of 10/28/08 to Office Action of 4/28/08

appearance of the skin comprising Ascorbylmethylsilanol Pectinate, Cholecalciferol Polypeptide, and at least two components selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.

6. (Previously Presented) A composition as claimed in claim 1, further comprising glycolic acid.
7. (Previously Presented) A composition as claimed in claim 2, further comprising glycolic acid.
8. (Previously Presented) A composition as claimed in claim 3, further comprising glycolic acid.
9. (Previously Presented) A composition as claimed in claim 4, further comprising glycolic acid.
10. (Previously Presented) A composition as claimed in claim 5, further comprising glycolic acid.
11. (Previously Presented) A composition as claimed in claim 1, wherein said composition is provided as part of a substance for application to the skin.
12. (Previously Presented) A composition as claimed in claim 11, wherein said substance is a gel.
13. (Previously Presented) A composition as claimed in claim 11, wherein said substance is a creme.
14. (Previously Presented) A composition as claimed in claim 11, wherein said substance is a lotion.
15. (Previously Presented) A composition as claimed in claim 11, wherein said composition is provided at a concentration of 1-10%.
16. (Previously Presented) A composition as claimed in claim 11, wherein said composition is provided at a concentration of 2-5%.
17. (Previously Presented) A composition as claimed in claim 11, wherein said composition is provided at a concentration of 10-20%.

Application of Simon Erani  
Serial No. 09/922,233 filed 8/3/2001  
Response of 10/28/08 to Office Action of 4/28/08

18. (Previously Presented) A composition as claimed in claim 11, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.
19. (Previously Presented) A method comprising:  
providing a composition for application to human skin to improve the appearance of the skin,  
said composition comprising MDT-5;  
said MDT-5 consisting of a form of Vitamin A, a form of Vitamin C, a form of Vitamin E,  
a form of Vitamin D, and a form of Vitamin B3;  
said form of Vitamin A consisting of Retinyl Palmitate Polypeptide;  
said form of Vitamin C consisting of Ascorbylmethylsilanol Pectinate, such that said  
composition does not include Ascorbic Acid Polypeptide;  
said form of Vitamin E consisting of Tocopheryl Polypeptide;  
said form of Vitamin D consisting of Cholecalciferol Polypeptide; and  
said form of Vitamin B3 consisting of Niacinamide Polypeptide.
20. (Previously Presented) A method as claimed in claim 19, wherein the ratio of said Retinyl  
Palmitate Polypeptide to said Ascorbylmethylsilanol Pectinate to said Tocopheryl  
Polypeptide to said Cholecalciferol Polypeptide to said Niacinamide Polypeptide is  
95:1.25:1.25:1.25.
21. (Previously Presented) A method comprising:  
providing a composition for application to human skin to improve the appearance of the skin,  
said composition comprising Ascorbylmethylsilanol Pectinate and Cholecalciferol  
Polypeptide.

Application of Simon Erani  
Serial No. 09/922,233 filed 8/3/2001  
Response of 10/28/08 to Office Action of 4/28/08

22. (Previously Presented) A method as claimed in claim 21, wherein said composition further comprises at least one component selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.
23. (Previously Presented) A method as claimed in claim 21, wherein said composition further comprises at least two components selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.
24. (Previously Presented) A method as claimed in claim 19, wherein said composition further comprises glycolic acid.
25. (Previously Presented) A method as claimed in claim 20, wherein said composition further comprises glycolic acid.
26. (Previously Presented) a method as claimed in claim 21, wherein said composition further comprises glycolic acid.
27. (Previously Presented) A method as claimed in claim 22, wherein said composition further comprises glycolic acid.
28. (Previously Presented) A method as claimed in claim 23, wherein said composition further comprises glycolic acid.
29. (Previously Presented) A method as claimed in claim 19, wherein said composition is provided at a concentration of 1-10%.
30. (Previously Presented) A method as claimed in claim 19, wherein said composition is provided at a concentration of 2-5%.
31. (Previously Presented) A method as claimed in claim 19, wherein said composition is provided at a concentration of 10-20%.
32. (Previously Presented) A method as claimed in claim 19, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.
33. (Previously Presented) A method as claimed in claim 20, wherein said composition is

Application of Simon Erani

Serial No. 09/922,233 filed 8/3/2001

Response of 10/28/08 to Office Action of 4/28/08

provided at a concentration of 1-10%.

34. (Previously Presented) A method as claimed in claim 20, wherein said composition is provided at a concentration of 2-5%.

35. (Previously Presented) A method as claimed in claim 20, wherein said composition is provided at a concentration of 10-20%.

36. (Previously Presented) A method as claimed in claim 20, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.

37. (Previously Presented) A method as claimed in claim 21, wherein said composition is provided at a concentration of 1-10%.

38. (Previously Presented) A method as claimed in claim 21, wherein said composition is provided at a concentration of 2-5%.

39. (Previously Presented) A method as claimed in claim 21, wherein said composition is provided at a concentration of 10-20%.

40. (Previously Presented) A method as claimed in claim 21, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.

41. (New) A method of treating human skin, comprising the steps of:

applying a sequence of compositions to the human skin to improve the appearance of the skin, comprising the steps of:

applying a first composition to the human skin, wherein said first composition comprises 2% - 20% glycolic acid;

Application of Simon Erani  
Serial No. 09/922,233 filed 8/3/2001  
Response of 10/28/08 to Office Action of 4/28/08

applying a second composition to the human skin, wherein said second composition comprises 3-70% Ascorbylmethylsilanol Pectinate; and,

applying a third composition to the human skin, wherein said third composition comprises a mixture of Retinyl Palmitate Polypeptide, Ascorbylmethylsilanol Pectinate, Tocopheryl Polypeptide, Cholecalciferol Polypeptide, and Niacinamide Polypeptide.
